

Radon Action Month Promotion Toolkit

Social Media Content

Radon is a naturally occurring radioactive gas that can enter homes through the foundation and become trapped. Radon is the second leading cause of lung cancer in the United States and testing is the only way to know if your home has elevated levels of radon. 🏠☢️

Stop by Livingston County Health Department or a participating local township office to get your free radon test kit.

Learn more: <https://bit.ly/49gGvuR>

Test your home to determine whether your home has elevated radon levels. Winter is the best time to test for radon.

January is National Radon Action Month

Test your home.
Protect your health.

EPA epa.gov/radon

Radon is a naturally occurring radioactive gas.	It can enter your home through the ground and affect indoor air quality.	When inhaled, the radioactive particles can damage DNA and cause lung cancer.	The only way to know if your home has high levels of radon is to test.

Test. Fix. Save a life. Learn more at epa.gov/radon.

Did you test your home for radon and find radon levels greater than 4 pCi/L? If so, installing a radon remediation system can reduce radon levels.

The image shows a radon test kit form with various fields for user information and test details. A red circle highlights the 'USE BY' date 'Dec 2023' on the left side. A black arrow points from this date towards the center of the form. The form includes fields for NAME, TEST ADDRESS, TEST STATE, TEST ZIP, EMAIL ADDRESS OR CELL PHONE NUMBER, START DATE, START TIME, END DATE, ROOM TEMP., FLOOR TESTED, ROOM TESTED, and TESTING FOR. There are also checkboxes for CRAWLSPACE VENTS OPEN, CLOSED HOUSE CONDITIONS?, and POST-INSTALLATION.

**Find the expiration date for
your radon test kit here!**

Have you tested your home for radon yet? Winter is the best time to test your home for elevated radon levels.

Don't have a test kit? Pick up a free test from Livingston County Health Department or a participating local township office through January 31, or while supplies last.
